

SUBSTRATUM 3F

Polyurethane Rigid Foam System

Substratum 3F is a two-component polyurethane rigid foam. This product is excellent for lifting settled pavement, stabilizing weak soil, and the filling or encapsulating of various voids. It has been specially formulated utilizing a fully EPA approved, non-CFC, non-HFC, zero ozone depleting blowing agent.

Substratum 3F is inherently hydrophobic and is capable of being directly injected into water. Due to the hydrophobic nature, this product is excellent for lifting and/or stabilizing in areas with a high level of moisture content. The low viscosity of the system allows for easy penetration into soil and displaces water without losing product integrity as it stabilizes and lifts.

Storage and Handling

Substratum 3F has a shelf life of 1 yr when stored in the original, sealed container at a temperature of 65°F - 85°F with humidity levels not greater than 85% and also not in direct sunlight. The “A” component is very sensitive to moisture and caution must be taken to ensure moisture is not introduced. Prolonged storage at temps below 60°F can affect both the “A” and “B” components.

Should the materials be subjected to temperatures at or below 40°F, there may be layering in the B-side containers. Should this occur, gradually raise the temperature to 70°F and use a drum or tote mixer for 30 minutes or more. The material will go back into the proper solution and is then usable.

Containers of Component-A should be kept properly closed and stored indoors at ambient temperatures (20 - 25°C) (65 - 80°F) in a well-ventilated area. Storage at low temperatures (below 5°C, 40°F) may lead to some crystallization; this material must, therefore, be protected from frost. If crystallization does occur, the material should be heated but not to exceed 70°C, 158°F, to melt it out, and should then be thoroughly agitated before use. Note that the product will decompose and give off gas above 230°C, 446°F.

DISCLAIMER: THE DATA PRESENTED HEREIN IS NOT INTENDED FOR USE BY NONPROFESSIONAL APPLICATORS, OR THOSE PERSONS WHO DO NOT PURCHASE OR UTILIZE THIS PRODUCT IN THE NORMAL COURSE OF THEIR BUSINESS. THE POTENTIAL USER MUST PERFORM ANY PERTINENT TEST IN ORDER TO DETERMINE THE PRODUCT'S PERFORMANCE AND SUITABILITY IN THE INTENDED APPLICATION. SINCE FINAL DETERMINATION OF FITNESS OF THE PRODUCT FOR ANY PARTICULAR USE IS THE RESPONSIBILITY OF THE BUYER.
